

CERAMIC PRO

9H

Ceramic Pro 9H is a permanent multi-layered clear nanoceramic coating. When cured, it will transform to a flexible glass shield protecting any surface and providing an easy-to-clean effect.

PRODUCT INFORMATION

CATEGORY:	Coating	SPECS:	
FEATURES:	Permanent protection Extreme hardness Super hydrophobic Self-cleaning UV resistant High gloss	Type:	Permanent, multi-layering
USAGE AREAS:	Exterior Interior Wheels Rims	Base:	Solvent Based
INDUSTRIES:	Automotive Aviation	Water contact angle:	110°
BOTTLE SIZES:	50ml / 1000ml	Air cure:	1-2 hours at 25°C (dry surface) 3-5 days at 25°C (full dry)
		Thermal cure:	20 minutes at 130°C 10 minutes at 200°C
		Application:	Wiping, dipping, spraying
		Pencil Hardness:	up to 9 hours
		Thickness of coating:	Up to 2 microns per layer
		Applicable materials:	Metal, wood, leather, plastic, paint, car clear-coat
		Consumption:	5-10 ml per m ² per one layer
		Density:	0.94-0.96 g/cm ³

TEST RESULTS

Ceramic Pro 9H has been exposed to SGS testings. SGS is the world's largest and leading inspection, verification, testing and certification company trusted by millions.
