

CERAMIC PRO

MARINE

Ceramic Pro Marine is a clear nanoceramic coating protecting multiple surfaces by creating a barrier against fouling, seawater, oxidation, UV rays, stains, dirt, grime and chemicals.

PRODUCT INFORMATION

CATEGORY: Coating

FEATURES: Fouling release
9H hardness
High gloss
UV resistant
Hydrophobic
Corrosion resistant
Oxidation resistant

USAGE AREAS: Interior
Exterior

INDUSTRIES: Marine

BOTTLE SIZES: 50ml / 100ml / 250ml /
500ml / 1000ml

SPECS:

Type:	Permanent
Base:	Solvent Based
Water contact angle:	110°
Air cure:	8 hours at 25°C (dry surface) 3-5 days at 25°C (full dry)
Thermal cure:	30 minutes at 130°C 10 minutes at 200°C
Application:	Wiping, bushing, dipping, spraying
Pencil Hardness:	Up to 9H
Thickness of coating:	Up to 20 micron
Applicable materials:	Metal, wood, gel-coat, surfaces below waterline
Consumption:	10-15 ml per m ²
Density:	0.94-0.96 g/cm ³

TEST RESULTS

Ceramic Pro Marine has been exposed to SGS testings. SGS is the world's largest and leading inspection, verification, testing and certification company trusted by millions.
